# Payroll System

Pay roll system is used to manage the pay and other details of employees. As the no of employees grows with the business growth keeping track of employee payment manually become tough. So an automated system is required.

1. On clicking the link of payroll system on home page will take you to employee's list page. You can view every employee details in this page. There are 4 links referred in above image have following usage-
   - First one is used to create new employee details.
   - Second is to view the departments and every employee is associated with one department. You can see the last field name has "Department" in employee details row.
   - Third link shows the list of salary paid to an employee in current year.
   - Fourth link is used to add /view dependents associated with an employee.
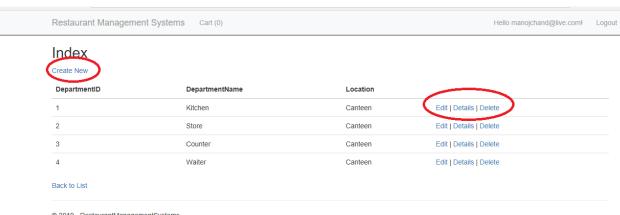

All the four links take you to different page listed below.
